

	<h2>Integrated Policy</h2>	<h3>Att. 1 Company Profile</h3>
--	----------------------------	-------------------------------------

Update at 03.09.2021 (REV.06)

POLICY 2021

Apyros mission has always been the will to provide a highly specialized and complete service as regards Fire Fighting.

Thanks to qualified experience and know-how in various sectors, including the industrial, off-shore and naval, we have created an expert team capable of fulfilling any fire-fighting request, guaranteeing the customer complete consultative, design and project management support.

At present, the General Management is committed about pursuing a lasting development so that the organization can ensure its long-term survival and success: this can be achieved by combining the quality of the service with attention to the environment, to the consumption of natural resources, to the minimization of its impacts.

As regards Quality, the Management has decided to standardize the company management through the principles of UNI EN ISO 9001: 2015 standard.

The new approach of the standard to risk-based thinking facilitates organizations in a re-organization process aimed at the actual risks they face in the current market by offering the opportunity to identify the best cost-effective strategies.

The adaptation of the Quality Management System to the requirements of the new standard is also necessary to ensure continuous compliance of the product / service with the requirements coming from the customer, the applicable laws and the reference Regulations and to support the clients.

Our commitments for the full achievement of the set objectives are:

- ✓ Preserve the certification of Quality Management System
- ✓ Understand and anticipate customer needs
- ✓ Improve even higher skills
- ✓ Knowledge sharing
- ✓ Encourage teamworking

From an Environmental point of view, our Company complies with the UNI EN ISO 14001: 2015 standard, with all applicable legislation on the matter (international, national, local) and with any other provisions possibly signed, thus proposing to prevent anyway the different forms of pollution that could be caused directly or indirectly by our activity, establishing the following guidelines - that will be pursued by all staff:

- Compliance with mandatory environmental legislation applicable to company activities;
- Reduction of energy consumption;
- Maximum commitment to continuous improvement and mitigation of environmental impacts;
- Protection of natural resources through the separation of waste fractions;

	<h2>Integrated Policy</h2>	Att. 1 Company Profile
--	----------------------------	-----------------------------------

- Spreading of environmental policy at various levels.

From a safety point of view, our Company complies with the UNI ISO 45001:2018 standard, with all applicable legislation on the matter (international, national, local) and with the other provisions possibly signed, thus proposing to prevent any way accidents and any non-compliance, related to health and safety in the workplace, establishing the following guidelines - that will be pursued by all staff:

- Compliance with mandatory legislation related to security applicable to company activities;
- Reduction of accidents;
- Maximum commitment to continuous improvement and mitigation of aspects related to health and safety in the workplace;
- Analysis of near accidents, accidents and injuries
- Spreading of security policy at various levels.

Apyros General Management ensures that the integrated policy is understood, implemented and supported through:

- Training and information;
- Continuous awareness;
- The Improvement Plan of the Integrated Management System, drawn up annually to highlight the objectives of the improvement, the means to obtain them and the indicators to verify their achievement.

The Management and Supervisors are at your disposal for any further clarification.
